

REMARKS

Claims 1-8, 10-24, 29 and 31-33 are pending in the application. Claims 1, 10 and 29 have been amended. Claims 9 and 30 have been canceled. New claim 33 has been added. No new matter has been added. In view of the foregoing amendments and the following remarks, Applicants respectfully request allowance of the application.

INTERVIEW

Applicants thank Examiner Werner for the courtesies extended to Applicants' representatives Wesley Jones and Brett Watkins during the telephone interview of November 1, 2007. A summary of the substance of the interview is set forth below.

During the interview, Applicants' representatives asserted that the applied §102 reference did not anticipate independent claims 1, 10 and 29. The Examiner indicated that amending the independent claims to clarify motion vector calculation operations and motion speed determination operations would overcome the applied §102 reference (this was reiterated in the Examiner's Interview Summary issued November 2, 2007). Applicants herein have amended the independent claims to illuminate these operations as suggested by the Examiner.

PRIOR ART REJECTIONS

Applicants herein have adopted suggestions by the Examiner for overcoming the applied §102 reference. Applicants therefore request that the rejection of all claims based on the applied §102 reference should be reconsidered and withdrawn.

CONCLUSION

In view of the above amendments and arguments, it is believed that the above-identified application is in condition for allowance, and notice to that effect is respectfully requested. Should the Examiner have any questions, the Examiner is encouraged to contact the undersigned at (202) 220-4430.

The Commissioner is authorized to charge any fees or credit any overpayments which may be incurred in connection with this paper under 37 C.F.R. §§ 1.16 or 1.17 to Deposit Account No. 11-0600.

Respectfully submitted,

Date: November 16, 2007

/Wesley W. Jones/
